## Did you Know?

Check ups are very important to your health. Schedule an appointment with us to discuss what screenings and exams you need and when you need them. Regular health exams and lab testing can help you find problems early. By getting the right health services, screenings, and treatments, you are taking steps that help your chances for living a longer, healthier life. Your age, health, family history, lifestyles choices (i.e. What you eat, how active you are, whether you smoke), and other important factors impact what and how often you need healthcare.

## Did you Know?

Lab testing plays an important role in your health. Your healthcare provider will use lab results to help guide most of your healthcare decisions. Some of our lab services are available without a doctor's order. All lab test results are sent back to the ordering medical provider, or individual (where a doctor's order was not needed) within one week. You will be given instructions at the time labs are drawn. We do not interpret your results, diagnose, or treat.

## HEALTH CHECK

A physical exam is a vital part of preventative medicine for all people regardless of age, sex, or activity level. During this exam our Family Nurse Practitioner will listen to your heart and lungs and look in your eyes, ears, nose and throat. A physical exam can assess your risk for disease and various conditions such as diabetes or high blood pressure. It gives you the chance to voice any concerns about pain or symptoms that you might have.
